The Alere Triage® MeterPro is the trusted choice in thousands of healthcare facilities worldwide. A comprehensive test menu provides the diagnostic answers you need to make rapid, cost-effective treatment decisions at the point-of-care (POC).

**Alere Triage BNP Test**
Accelerate Heart Failure treatment decisions or risk stratify ACS at the point of care or in the laboratory with the Alere Triage® BNP Test, a rapid, quantitative test for the measurement of BNP.

**Alere Triage Cardiac Panel**
The Alere Triage® Cardiac Panel offers rapid, quantitative measurement of CK-MB, myoglobin, and troponin I to aid in the diagnosis of acute myocardial infarction.
Alere Triage D-Dimer Test
Quickly, easily, and inexpensively assess patients suspected of having PE/DVT in about 15 minutes with the Alere Triage® D-Dimer Test.

Alere Triage MeterPro
The Alere Triage® MeterPro is a high-performance, comprehensive testing platform for use in the laboratory or at the point of care, and is the trusted choice in thousands of hospitals and physician offices worldwide.

Alere Triage ProfilER SOB Panel
Distinguish between the many causes of shortness of breath in about 15 minutes with the Alere Triage® Profiler SOB™ Panel.

Alere Triage System Tests
The Alere Triage® MeterPro is the trusted choice in thousands of healthcare facilities worldwide.

Alere Triage® BNP Test for Beckman Coulter Immunoassay Systems
Empower higher throughput BNP with rapid testing and automation on the Beckman Coulter UniCel® Dxl 800 or Beckman Coulter Access® 2 Immunoassay System.

Alere Triage® Cardio2 Panel
The Alere Triage® Cardio2 Panel is a fluorescence immunoassay, to be used with the portable Alere Triage® MeterPro, for quantitative measurements of next generation Troponin I and B-type Natriuretic Peptide.

Alere Triage® Cardio3 Panel
The Alere Triage® Cardio3 Panel is a fluorescence immunoassay, to be used with the point-of-care Triage® MeterPro, for quantitative measurements of CK-MB, next generation Troponin I and B-type Natriuretic Peptide.
Alere Triage® CardioRenal Panel
Assess Heart Failure and Kidney Injury simultaneously with BNP + NGAL in a single whole blood or plasma test. (Not available in the USA)

Alere Triage® NGAL Test
Studies have shown that NGAL levels can provide early information regarding the risk of AKI development. (Not available in the USA)

Alere Triage® NT-proBNP
Empower heart failure treatment decisions or risk stratify patients with ACS at the point of care or in the laboratory with the Alere Triage® NT-proBNP Test, a rapid, quantitative test for the measurement of NT-proBNP.

Alere Triage® P₄GF Test
Pre-eclampsia is a life-threatening condition that affects 2-8% of pregnancies worldwide. It is a complex clinical syndrome that can progress rapidly and unpredictably, requiring costly and frequent clinical assessments to determine if early delivery is medically necessary.

Alere Triage® TOX Drug Screen
Rapid results for the ED. Accuracy for the lab. Alere Triage® TOX Delivers. When choosing a rapid drug screen there are many factors to consider: accuracy, ease-of-use, system interface capabilities and test selectivity. The instrumentation of the Alere Triage® TOX Drug Screen platform provides these features.

Alere Triage® Troponin I
The Alere Triage® Troponin I Test is a fluorescence next generation immunoassay, to be used with the point-of-care Alere Triage® MeterPro, for quantitative measurements of next generation Troponin I.

Triage 8 Drugs of Abuse Panel
The Triage® Drugs of Abuse Panel is an immunoassay used for the qualitative determination of the major metabolites of drugs of abuse (Benzodiazepines, Cocaine Metabolite, Amphetamines, Methadone, Tetrahydrocannabinol, Opiates, Barbiturates), Tricyclic Antidepressants in urine.
